

Can you Spare 2 weeks?

HELP THE ICHF BUILD SUSTAINABLE AND INDEPENDENT CARDIAC SURGICAL PROGRAMMES

www.babyheart.org

The International Children Heart Foundation needs your help in its mission to assist programs worldwide in building their capacity and skills to meet the demand for surgical treatment of congenital heart disease

Around 90% of the world's children born with a congenital heart defect have no access to surgical treatment. By partnerships of 3-5 years or more and 2-4 visits per centre, per year - the ICHF builds programs with an emphasis on local empowerment and education.

We need
Pediatric Intensivists
PICU Nurses
Respiratory Therapists
Perfusionists
Anesthesiologists
Cardiologists
Cardiac Surgeons

We send teams of 8-15 professionals to do 2 weeks of cardiac surgery (sometimes 1 week), and use the cases as a template for hands on experiential education - By joining us - you will directly benefit the lives of 15-25 children - but more importantly impart your knowledge and expertise to enable the local team to do many more cases, of increasing complexity, after the team leaves. This is our core objective and how we measure our success.

ICHF Mission statement:

www.babyheart.org

It is every child's right to be born into a world where he or she can thrive, grow to be strong and make their parents proud. It is not, however, every child's destiny.

Since 1994, the mission of the International Children's Heart Foundation (ICHF) has been to bring the skills, technology and knowledge to diagnose and care for children with congenital heart disease to developing countries that request our help. ICHF does this regardless of country of origin, race, religion or gender. Our teams are assembled from world class cardiac care centers. We implement our informational curriculum by operating with and educating local health care professionals. With this training, they in turn can care for the local children. Since inception, over 5,000 operations have been performed in countries that span all continents.

The mission of the International Children's Heart Foundation (ICHF) is to bring the skills, technology and knowledge to cure and care for children with congenital heart disease to developing countries. ICHF does this regardless of country of origin, race, religion or gender.

Our goal is to make the need for ICHF obsolete. We work toward this goal through our mission trips where we operate and educate local health care professionals, and provide needed equipment and medications.

As a 501(c)3 charitable organization, the ICHF enlists your support to provide hope and life for children throughout the developing world. Let our passion become yours!
